LAUNCHING 2020

Red Frogs Education

High School Presentations

**"Health is more than the
absence of illness. It is a state
of complete physical, mental
and social well-being."**

WHO, World Health Organisation

OUR PURPOSE

As our children become teens and as our teens become young adults, they are exposed to a wide variety of different social scenarios, more challenging and demanding than ever before.

Educate

RFE consists of presentations that educate young people about; safe partying behaviours, the impact of a decision made in a moment, the transitions of high school and lastly their inherent worth and value.

Equip

RFE equips young people with the information, advice and tools necessary to assist them in navigating many of the challenges they may face in this unique season of life.

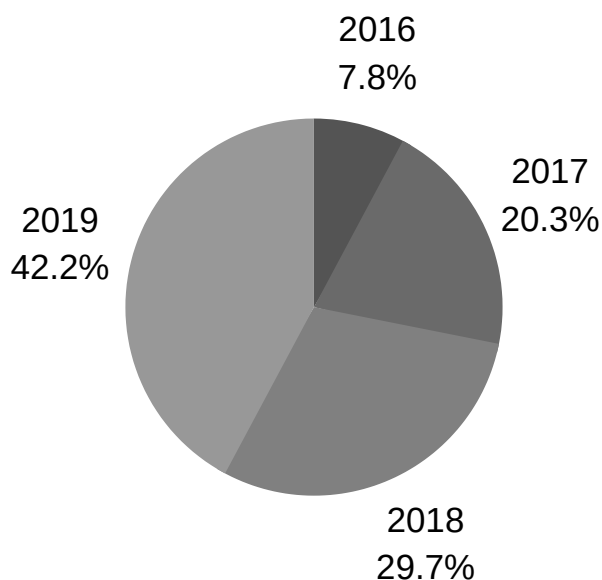

Empower

RFE empowers young people to be a voice of change within their culture, to make positive life choices, to dream big and to reach their potential.

RFE Growth

School Bookings for the last 4 years.

The increase in presentation bookings is an indication of Red Frogs Education growth and presence in high schools. It also shows the growing interest of educators, such as LO Teachers and Heads of Departments, who are seeking additional support when it comes to the emotional and social well being of their students.

We Introduce New Presentation Outlines

LIFE AFTER YEAR 12

We have rebuilt our "Party Safe Seminar" into a new talk:

Students on the brink of graduating from high school are excited to step into the world as fully fledged adults. We want to equip them with helpful hints and tips on how to 'adult' well and navigate this transition, being mindful of the impact that changes can bring. We speak into healthy habits, safety and managing their resources such as time, emotions and money.

At this stage of life society seemingly hands them a check list recipe for perceived happiness and success; a qualification, job, life partner, house and 2.5 children. We encourage them that their journey is their own and it can be as successful as they choose to make it. We believe a powerful skill to learn, is introspection, as it is needed in order to shift our own perspective on the events of life and focus on what is good or what can be good.

We believe in the potential of the next generation and we want to contribute to a firm foundation from which they can launch.

INSIDE OUT - GRADE 10s

The amount of pressure from peers, parents, teachers and societal voices significantly increases by Grade 10. As their pace of life changes, we want to slow things down and remind them of the importance of knowing their "why" behind the decisions that they make.

We speak into behavioural patterns that encourage self care and strength of character. We also highlight potentially harmful decisions and destructive avenues of behaviour.

We use stories and engaging analogies which students can relate to, to explain lessons and principles that guide our goals above

SELFIE - GRADE 8s

This talk addresses Grade 8s and the big leap into high school. As the title suggests, we want to speak into their 'self' as the core of who they are and what shapes to their identity. They are taking a tremendous amount of selfies but how much do they actually know about themselves? We share different ways to know yourself and care for and invest in your emotional and mental wellbeing. This talk focuses on providing practical tools to achieve helpful boundaries and healthy relationships.

We tell stories that illustrate the journey and benefits of knowing your value and worth and the concept of every action having a reaction. We use these methods and lessons to also talk into current cultural challenges such as social media, online influences and digital consumption.

WHAT WE WILL PROVIDE

- Relevant and relatable content
- Engaging media presentations
- Trained, fun and youthful presenters
- Experience and research based topics
- Genuine care for and connection with students
- Accessible information regardless of religion or background

"teachers say"

"The topics you raised were pertinent and the students certainly got the message that they need to look after each other. I think you did a great job in bringing awareness of how to have a great Vac. Thanks for serving our students and all the Matrics that will head off to their year end celebrations."

"The meeting was great, you really connected well with us and we were all listening intently to what you were saying. The ideas were really practical and I certainly feel more comfortable knowing that you are there for us."

"students say"

PARTNER WITH US

As we aim to present these talks in as many schools as possible across the country and safeguard the next generation.
